AMPM App – Compiled Questions & Answers

Q1. App for iOS, Android and Offline Access

Answer:

- The app is required for both iOS and Android.
- Offline access is required on the wedding day when the team is working in areas with poor network connectivity.
- Data should automatically synchronise when the device reconnects to the internet.

Q2. How do clients pay for the subscription?

Answer:

- AMPM will create the client's account or send an invitation link to create their wedding account.
- The client will enter basic wedding details and pay the hotel discovery subscription fee.
- Payment will be made online through card and UPI.

Q3. What is the subscription?

Answer:

- The subscription is specifically for the Hotel Discovery section.
- Subscription fee: ₹50,000 for one month.
- It is a one-time payment for the subscription period.
- When the subscription expires, clients retain the names of their saved hotels and read-only access to their enquiries.
- No data will be deleted. If the client renews the subscription, all previously saved data will remain available.

Q4. How does AMPM earn, and what financial information does the client see?

Answer:

- The hotel discovery subscription fee is ₹50,000 for one month.
- After hotel discovery, if the client decides to plan the wedding with AMPM, the wedding management fee will be decided separately by AMPM.
- Wedding management fees and commercial negotiations are outside the app's hotel discovery subscription module.
- Clients can see vendor profiles and service details only after booking AMPM for the complete wedding management service.
- Internal costs, profit margins and vendor rates must not be displayed in the app.

Q5. Who on the client's side can log in and approve?

Answer:

- Only two authorised family representatives can access the client portal:
  - One representative from the bride's side.
  - One representative from the groom's side.
- Both representatives will use the same login credentials.
- The families will mutually decide who is authorised to manage the portal.
- Cost and margin information will not be visible to clients.

Q6. What are the user roles and who can access costs and margins?

Answer:

- AMPM will manage the system and control access permissions.

- Internal costs, profit margins and vendor rates will not be displayed in the app.
- Staff access will be restricted according to their assigned responsibilities and work profiles.

Q7. How do guests respond, and what guest information is visible?

Answer:

- The system can support either:
  - One RSVP link for the bride's side and another for the groom's side, or
  - One common RSVP link for the entire wedding.
- The final link structure is to be decided.
- Guests will not be able to access other guests' information after submitting their RSVP.
- Guests will not have access to edit their submitted RSVP directly.
- If a guest requires a correction, they can submit a change request or use the help option to contact the RSVP caller.
- Only the two authorised family representatives can access the client portal and view RSVP updates.
- They cannot directly change the RSVP list or guest responses.
- EVA's authorised team can access guest counts and relevant guest details.

Q8. Will guest identity documents be collected?

Answer:

- Guest identity documents may be collected for hotel requirements, where necessary.
- The data will remain under AMPM's control.
- Guest data will not be deleted automatically; retention and deletion will be subject to AMPM's approval and data policies.

Q9. Hotel data: who maintains it, and what information is displayed?

Answer:

- EVA will provide and update hotel data.
- Hotel information will be reviewed and updated approximately three times a year, considering seasonal changes.
- The app will display hotel information, including:
  - Hotel and venue details.
  - Room information.
  - Photographs.
  - Food and menu information.
  - Approximate wedding package pricing.
- Clients will be shown approximate price ranges, not internal costs or profit margins.
- Hotel availability will not be checked continuously. AMPM will check availability when a client requests it or adds the hotel to their selection/cart.
- Photo usage rights and hotel data management will be controlled by AMPM.

Q10. What is included in the first release?

Answer:

- The app will include the hotel discovery demo and subscription workflow.
- Clients will be able to explore hotels and their details.
- The demo will be accessible after mobile number verification through OTP.
- The demo will show a limited selection of hotels and locations.
- Once the client books AMPM for complete wedding management, additional wedding planning and vendor selection modules will become accessible.
- Only EVA's authorised team can approve exceptions during wedding operations.

Q11. Which channels will be available for clients and guests?

Answer:

- Email and WhatsApp communication will be supported.
- The app will provide tracked requests and a conversation history.
- A live chat option will also be available on the home page.

Q12. Can the team edit the public website?

Answer:

- No. Website editing will not be allowed through the app.

Q13. How do people sign in?

Answer:

- Clients will sign in using their mobile number and OTP verification.
- Clients will not have unrestricted self-registration.
- AMPM will create the account or send an invitation link for the client to access the wedding account.
- The demo access process will be confirmed with the team.

Q14. Where is data hosted, and how quickly can it be recovered?

Answer:

- Final hosting arrangements, backup frequency and recovery timelines are yet to be confirmed.

Q15. How large will the system need to scale?

Answer:

- The app should support approximately 200 hotels at the start.
- It should support multiple weddings and departmental staff access.
- Final capacity requirements for simultaneous weddings, guests and staff will be confirmed separately.

Q16. Currency, language and invoices

Answer:

- Currency: Indian Rupees (INR).
- Primary language: English.
- The platform will not issue GST invoices directly.

Q17. Privacy wording and data retention

Answer:

- AMPM will decide the final privacy wording and data retention policy.
- Data retention and deletion will require AMPM's approval.
- Guest and wedding information must remain access-controlled.

Q18. Can weddings use multiple hotels or outside venues?

Answer:

- Yes. A wedding can involve multiple hotels and venues.

Q19. How will room blocks and rooming lists work?

Answer:

- Room blocks will be managed by hotel, room category and dates.
- Guest allocation and rooming arrangements will be handled by the team, not automatically by the app.
- Guest counts should support both room-wise and person-wise calculations.

Q20. Questions and messages in the portal

Answer:

- Both tracked requests with conversation history and live chat are required.
- Live chat should be available on the home page.
- Additional options may be added later.

Q21. How will change requests work?

Answer:

- Change requests should be submitted, reviewed, accepted or rejected, and then implemented.
- Changes to approved items should create a new version for approval.

Q22. Can vendors or hotels log in?

Answer:

- No. Vendor and hotel login access is not required in the current version.

Q23. What happens to client access after the wedding?

Answer:

- Clients will retain read-only access for three months after the wedding.
- After this period, the project will be archived.
- Records will not be deleted automatically.
- The exact closure and archiving process will be controlled by AMPM.

Q24. Feedback and archiving

Answer:

- A short feedback form will be provided after the wedding.
- The wedding project will be archived while preserving its records.

Q25. What qualifies as a material change?

Answer:

- The definition of a material change is not finalised.
- Budget-change percentages, date changes and venue-change thresholds will be decided by AMPM.

Additional Hotel Discovery Demo Requirements

- Clients must not be able to register independently without AMPM's involvement.
- A client can log in using their mobile number and OTP verification to access the demo.
- The demo should show a maximum of three locations, with limited hotel information and street-view access.

- The demo will provide access to selected hotels and approximate pricing.
- Clients may request a 15–20-minute Zoom call before purchasing the subscription.
- After the client agrees to proceed, AMPM will create their account or send an invitation link.
- The client will complete the basic wedding details and pay the ₹50,000 one-month hotel discovery subscription fee.
- Once the subscription expires, saved hotel names and enquiry history remain available in read-only mode.
- Renewing the subscription restores access to the saved hotel discovery data.
- Full wedding planning, vendor selection and related modules become available only after the client confirms the complete wedding management service with AMPM.
